Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, 11-15, 43-47, 49-51, drawn to a method of optimizing a shipment by determining one or more maximum loads of one or more transport vehicles, the shipment being to at least a first receiver of a plurality of products maintained by the first receiver in inventory at a receiver location, the shipment being from a first shipper at a first location and a second shipper at a second location different from the first location from the first location to the first receiver through a distribution point located at a distribution location remote from the receiver location, the first location and the second location, the first and second shippers being different business entities, classified in class 705, subclass 7.
 - II. Claims 52-78, drawn to a method of optimizing a shipment of merchandise by determining one or more maximum loads of one or more transport vehicles, the shipment being to a first receiver maintaining a first inventory of merchandise at a first receiver location and to a second receiver maintaining a second inventory of merchandise at a second location and to a second inventory of merchandise at a second receiver location, the shipment of merchandise being from a first shipper located at a first location from a second shipper located at a second source, classified in class 705, subclass 28.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as determining the limits of the flow of merchandise required to be maintained for a second inventory according to one or more metrics in response to second data received from a second receiver. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
